## Rockefeller Dies At 97

**14.36 MONTHS** Roosevelt's Wage-Hour Bill Sent to Congress

Flexible Labor Proposal Also Calls for Ban on Products of Child Labor and Goods of Employers Who Exploit Unorganized Workmen.

By The Associated Press

WASHINGTON, May 24.—John D. Rockefeller, 97, died today after a lifetime spent in building maximum wage minimums and a host of policies designed to aid and abet organized labor.

"All but the honestest of men will agree that it does serve our primary purposes that some power government must have some control over minimum hours, wages, working conditions, health, safety, the right or wrong by the use of skillworkers," he said.

He did not specify any standards in his long awaited substitute for the invalidated national industrial recovery act.

He left for congress to work on Tentative Bill Ready

A tentative draft of a bill was ready, however, for introducing in both houses dealing those standards.

# FIRST POPPY ALREADY SOLD

Marysville Woman and Son Start Sale Set for All Day Saturday

Although the poppy sale of poppies sponsored by the auxiliary to Fred M. Gandy's Post No. 16 American Legion got under way Saturday the first flower has been sold. Mrs. Billie F. Gandy, the woman who started the sale, said:

The flowers are made by hand and are \$1.00 each. A sum of \$100 will be given to the city of Marion by the Legion Auxiliary and the money will be used for the benefit of the Legion.

The net from purchasing the first flower will go to the Mrs. Opal Darby, a member of the auxiliary, in her care.

It was decided to let the first flower be a poppy this year. Mrs. Darby wrote to Mrs. E. M. Klemberg, a past president of the Legion Auxiliary, that the flower was mailed to her.

Following a response to the appeal for poppies, the workers reported to Mrs. Baldwin who is making a final check on the earnings of the teams. All the workers will have 15 hours of volunteer giving their time to bring the memorial flowers to the city and turning every penny of the contributions made for the flowers to their welfare fund for the care of elderly veterans and their families in Marion.

In addition the daughters of

## HELD BACK BY DIMPLES

*Camel*

© Camel 1933. R. J. Reynolds Tobacco Company. Winston Salem, North Carolina

**SPRINT STAR.** Arthur Langenre swam to a new 200-meter free-style record. "Camels give me a generous 'lift' in energy when I'm tired after swimming," says Art.

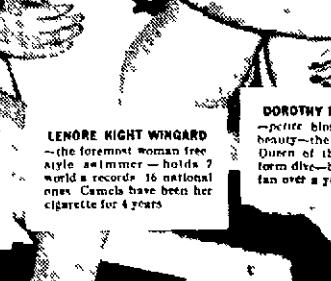

**JANE FAUNTZ MANSKA** started smoking Camels 2 years ago. This Colorado girl's superb diving form won her National and Olympic honors.

**MARGARET HUTTON** — former-style and backstroke champion and famous for her record breaking performances as a plunger — has smoked Camels since 1933.

**JOSEPHINE MCCRIM** — holds records in both spring and distance free-style events. Camels have been her favorite cigarette for 3 years now.

**GEORGIA COLEMAN** — made Olympic history in her spectacular springboard diving victory in 1932. She became a Camel smoker that same year.

**LENORE KIGHT WINGARD** — the foremost woman free-style swimmer — holds 2 world's records, 16 national ones. Camels have been her cigarette for 4 years.

**DOROTHY POYNTON HILL** — petite blonde Los Angeles beauty—the incomparable Queen of the 33 foot platform dive—became a Camel fan over a year ago.

**WHAT THESE ACE MERMAIDS SAY**—Dorothy Poynton Hill speaking: "I prefer Camels for their mildness. They never jangle my nerves. I can enjoy smoking as often as I wish. I think that another advantage of smoking Camels is the invigorating 'lift' they give me when I'm tired after a strenuous workout."

Lenore Kight Wingard—one of the greatest American women athletes of our times—adds that "I really get fun out of swimming. Hard work is part of the game. It's grand the way Camels help me enjoy my food no matter how tired or strained I may be. And I've found Camels do not irritate my throat."

*Camels*  
*Costlier Tobaccos*  
*Never get on your nerves*

Camels are made from finer, more expensive tobaccos—Turkish and Domestic—than any other popular brand.

## PAINTING UNVEILED AT AGOSTA CHURCH

Kenneth Kinsler Paints Jesus in Garden, Special Services Held

A 15-year-old boy, depicting Jesus in the Garden of Gethsemane, done in oil on canvas by Kenneth Kinsler, was unveiled yesterday morning at Agosta Methodist Episcopal Church in Marion. The painting, which cost \$100, was given to the church by Mr. and Mrs. Edward C. Edwards, of Marion, and the pastor Rev. J. P. Peeler, who gave a brief talk about the painting and its Biblical significance and a dedicational program was conducted by Mr. George Johnson and Mr. R. E. Ward, of Marion. The painting was unveiled September 1, 1933, appropriate to the day when Jesus entered Jerusalem before his crucifixion.

The painting was a child of his heart, the son of common sense and a desire to paint what he saw.

Indeed, he had had no other hobby but art, and his mother, Mrs. Edna Kinsler, was extremely well known among his friends.

On July 1, 1933, he began to work on a picture for Marion Insurance, depicting Jesus in the Garden of Gethsemane, and the painting was completed September 1, 1933, appropriate to the day when Jesus entered Jerusalem before his crucifixion.

Their names linked in American tragedy, in prophecy and in legend, Mr. and Mrs. Simpson's name is one more addition to the batch of monarchs, etc., the dark red Mr. Simpson has long been known as Edward VIII, the estranged husband of Lady Elizabeth Bowes-Lyon, the brilliant international talent she is said to be, the only woman who can amuse the king and take his mind off heavy affairs of state.

Now he's out was starting.

On July 9, 1937, again had

Mr. Simpson's name is one of his guests alone this time without his mother or his estranged husband—at a small dinner party at York house, St. James's palace.

On Aug. 8, Edward left England for the start of his month's holiday cruise in the Atlantic and Aegean seas aboard the \$100,000 steam yacht *Nahlin*—and although the names of other cruise guests were listed, dispatches to American newspapers pointed out this interesting fact.

The name of one of the most popular members of Edward's set, Mrs. Ernest Simpson did not appear on unofficial lists of royal guests published in London.

Why?

The answer is known now is that the husband's campaign of the British press had already started—the campaign of discreet silence which was to boomerang with such explosive effect on a British public which did not know up to the last minute that Edward's first great love in his life had precipitated a grave constitutional crisis.

(Tomorrow: The Simpson di-

rect, the beginning of the attack on Edward.)

## JUDGE YOUNG ON MT. VERNON BENCH

Common Pleas Judge Hector S. Young was to serve on the Know-Nothing bench at Mt. Vernon today.

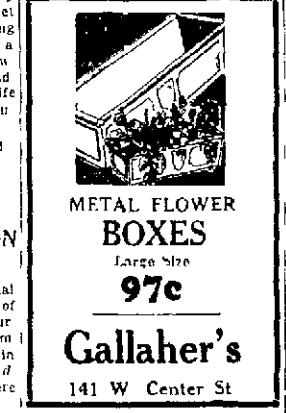

Young, who has been assigned to the bench, will be joined by Mr. and Mrs. Charles E. Parker, of Marion, and Mr. and Mrs. Frank C. Parker, of Marion.

The funeral was conducted t

# ANNUAL INCOME ONCE ESTIMATED AT \$50,000,000

**Corporations Of Oil King Were Capitalized At Over Five Billions**

## GAVE AWAY MILLIONS

**Poured Money Into Research And Education After Piling Up Huge Fortune**

**By E. L. D. Jr.**  
The combined capitalization of the Rockefeller controlled corporations probably exceeded \$50,000,000 and during the later years of his active life the Standard Oil income was estimated at \$50,000,000. The original investment in Pennsylvania oil fields was not more than \$75,000.

John D. Rockefeller already was a successful business man when his attention was directed to the profit from one of America's great oil mineral resources—oil.

Previously as a combination merchant and warehouseman Mr. Rockefeller had cleared between \$400 and \$10,000 over a period of years all of it reinvested in constantly increasing profits.

**He Driven Great Firm**

It was Mr. Rockefeller who was the next firm's schemer. He devised the plans for expansion for destroying competition and for merging with other companies into the \$1,000,000 Standard Oil Co forerunner of the world's first billion dollar trust.

In 1875 he was in desperate financial straits but he pulled through because he had extended his line so far that to crush him would have precipitated a general crash. By 1878 he had completely recovered and the modern Standard Oil Co had arrived.

The turn of the century found him the world's richest man subject to all the hatred and bitterness that went with the titanic combats attacked in the courts and equal to constantly the subject for bitter publicity.

**Tide Of Money Reversed**

Then early in the century the inflow of money to his personal coffers was reversed and the tremendous torrent of benefactions began.

No complete list of these benefactions is possible although ten years ago they had reached more than \$800,000,000 because many of his smaller donations—smaller in that they consisted of a few hundred thousands—were recorded only by his bookkeepers and were given to the publicity.

His greatest monument however was the gigantic Rockefeller foundation with an endowment of \$1,270,000. Closely approaching his mammoth philanthropy was the General Education board with \$129,187,000 and the Laura Spelman Rockefeller memorial with \$75,875,000.

### Millions For Education

He poured \$40,000,000 into the University of Chicago and nearly \$40,000,000 into the Rockefeller Institute for medical research. The international education board received \$21,000,000. Baptist mission ary societies benefited by more than \$20,000,000.

The New York public library was given \$3,500,000 and the bureau of social hygiene nearly \$3,000,000.

In the beautiful Rhine's castle land the shattered walls have been restored; the wrecked roofs replaced; the ancient blinglass windows taken from the ground where they were buried and refitted to new windows. The people of Rhine's—and the citizens of Versailles where the old palace of Louis is equally restored—praised Mr. Rockefeller and told him it cost the American \$2,800,000.

### Others Given Fortunes.

At Hampton Tuskegee International house the League of Nations library Palestine the Woods Hole biological laboratory city and state unemployment funds—without discrimination—all profited at from one to three millions.

The remainder of his fortune was turned over to his son John D. Rockefeller as a trust for the next oil king. Except of course to enough money to permit him of the simple luxury of the Pocantico Hills estate and the winter home in Florida.

### BAPTISTS RECEIVED MILLIONS FOR WORK

**Rockefeller Larish With Cash Gifts Until Late In '35**

The Nothers Baptist church one of the principal beneficiaries of the Rockefeller charities received annual gifts ranging from \$250,000 to \$1,000,000 from both the Rockefeller families.

Among the largest gifts was the fund for completing the imposing Riverside Baptist church.

In 1926 Mr. Rockefeller Jr. parked \$200,000 toward a \$1,000,000 building fund and later gave another \$50,000 contingent upon a her contributions.

In 1929 the church received \$2,000,000 to perpetuate the name of Mrs. Rockefeller Sr.

However in 1935 Mr. Rockefeller Jr. reversed his previous attitude and announced that future gifts would be to specific agencies of the church. This was held to reflect a growing belief in an interdenominational form of worship. Specific projects of the church with inter-denominational or non-denominational appeal would receive funds gifts he expected.

TOWARD THE CLOSE OF A LONG, HAPPY LIFE

# Gigantic Standard Oil Trust Blazed Trail For Monopolies

"Trust Busters" At Turn Of Century Found Rockefeller A Shining Target For Their Attacks. Company Paid A Total Of \$751,000,000 In Dividends

**By The Associated Press**  
The Rockefeller oil trust, one of the world's largest, was organized in 1870 by Col. Edward Drake in August 1870. It was the beginning of a new field of wealth to men of vision and organization ability. Mr. Rockefeller soon proved himself a head and shoulders above others and rushed to go in on the ground floor.

Mr. Rockefeller did not join in at once. He and his partners in the Standard Oil Co., Maurice B. Clark, sat on the sidelines. They had more to invest in a going business but refused to gamble until the business took some tangible form.

When in 1871 they did enter the field progress was rapid and in a few short years the handwriting was on the wall for Rockefeller's company. Rockefeller & Clark faded in to the background.

### Standard Led The Way

The name Rockefeller ranked first in Cleveland. The world's largest refinery, the Standard Oil Co., was all here to the industry—the greatest monopoly of all time. The golden streams of oil that poured thru its pipelines reached the four corners of the earth. They came back in the form of an unending flood of gold most of which was diverted to the treasure house of Rockefeller.

John D. Rockefeller and his associates though young men were experienced veterans in business trained for years in ways of economy and exact accounting. They seemed to manage better than any of their competitors. When they formed the Standard Oil Co. of Ohio they had the largest refining business in Cleveland.

Nevertheless they had their neighbors that unless some sort of organization could be formed for mutual protection they could see that they as well as the others would be wiped out one by one as the market fluctuated. Accordingly Mr. Rockefeller first asked the largest firm among his competitors if it would care to join forces with the Standard Oil Co. The offer was accepted at once. Other neighbors then came in until at the end of two years nearly all of the petroleum refiners of Cleveland were members of the Standard Oil Co.

Soon the principal refiners of

the Standard Oil Co. was split prosperously more than when under one direct control.

We were simply trying to compass a situation, was the answer Mr. Rockefeller gave when asked why he company was first organized. But no man or concern was ever forced into the Standard Oil Co. Any such charge is ridiculous. We treated the smallest and weakest of our competitors with just as much consideration as the biggest and ablest.

Our organization was formed up on the principles of cooperation, conservation and service.

Again when the sun was rising period was at its height Mr. Rockefeller said.

Sometimes things are said about us that are evil and they hurt. But I never do evil. I believe in man and the brotherhood of man, and am confident everything will come out for the good of all in the end. I have decided to say nothing hoping that after my death the truth will gradually come to the surface and that posterity will do justice.

John D. Rockefeller during his lifetime was no curiously prototypical as that of his father William Avery Rockefeller—Dad to his friends and much of the middle west during the Civil War era.

No one outside the family appears to know just how old William

Rockefeller was when he died or for that matter just when he did die. It is generally believed that he like his more famous son lived to be nearly 100 or perhaps passed the century mark.

As his son grew in prominence

William Rockefeller with even a life of his own moving about the west and visiting his children at rare intervals. It is known that he was still alive in 1908 and that he was born around 1810.

John D. Rockefeller was a born trader. His four ways of making money ranging from contests, sale of patent medicines to trading ponies. He toured the midwest selling his cancer remedy during the years when John D. was growing up.

William Rockefeller passed on to his son his unique ability for making money. He loved to drive sharp bargains with his children, chucks, when they discovered them selves on the short end of the deal and pointing out to them their mistakes—without offering to return to them their losses.

He provided well for his family and supplied his sons with capital when they entered business. The Rockefellers were never poor but he saw to it that the family was educated to the principal of hard work, mental and physical.

From his mother Eliza Davison Rockefeller, the oil king inherited the rest of his traits not present in his father's makeup. Eliza was deeply religious and handed down to her children a sense of moral behavior which became tradition in the later day Rockefellers.

John D. Rockefeller's advice was a triumph over one which struck him in his prime.

Some digestive ailment traced down caused him to give away from a square meal powerful shoulders that he could not bear him.

The size of his estate was not disclosed though it was believed to be \$4,000,000. With the exception of \$100,000 devised to John D. Gardner, he died with the will he was daunted equally among his heirs or his wife William G. and Peter A. Rockefeller, Mrs. Emma Rockefeler McAlpin and Mrs. Geraldine Rockefeller Dodge.

John D. and William Rockefeller were not much alike. William was a member of many clubs and led them but the elder brother belonged to few clubs and seldom went to them. The younger man was no public figure but he interested in philanthropic work and was more prominent in religious activities. His large known public bequests to the United States total \$100,000 to the Red Cross and \$100,000 to the National Foundation for Health.

The brothers were summer neighbors in Tuxedo Park, N. Y. One of them died in 1922 and his estate was bequeathed to his widow and three daughters.

William Rockefeller moved to New York from Cleveland in 1864 to take charge of his father's oil business at his estate near North Tonawanda, N. Y. June 24, 1922, he had been ill health for years.

# MOST FAMOUS SON OF A FAMED FATHER

When Mr. Rockefeller decided to step down from the throne of his oil empire back in 1911, he found his son John D. Rockefeller Jr. able and willing to assume the burden of carrying on. Under John D. Jr.'s careful guidance, the family fortunes have continued to prosper and the family philanthropies extended into many new fields.

# 'Doc' Rockefeller Trained John D. In Money Making Art

William And Frank Worked With John D. In Early Years Of Dynasty.

When the legend surrounding John D. Rockefeller during his lifetime

is considered, it is curious that his father William Avery Rockefeller was no less remarkable.

In the old days in Cleveland there were three Rockefeller brothers. In the Standard Oil Co. John was the oldest, William was two years younger than John and Frank was four years younger than William.

Frank was a vice president of the company when he served business connections with his older brother and in 1900 bought 17,000 acres at Belvidere, Kansas for a model stock farm.

From then on until just before he died in 1917 he was a self designated boss farmer, raising the part, repairing fences, digging ditches, breeding his own strains of cattle and developing his own ranches around his place.

As his son grew in prominence William Rockefeller with even a life of his own moving about the west and visiting his children at rare intervals. It is known that he was still alive in 1908 and that he was born around 1810.

John D. Rockefeller was a born trader. His four ways of making money ranging from contests, sale of patent medicines to trading ponies. He toured the midwest selling his cancer remedy during the years when John D. was growing up.

William Rockefeller passed on to his son his unique ability for making money. He loved to drive sharp bargains with his children, chucks, when they discovered them selves on the short end of the deal and pointing out to them their mistakes without offering to return to them their losses.

He provided well for his family and supplied his sons with capital when they entered business. The Rockefellers were never poor but he saw to it that the family was educated to the principal of hard work, mental and physical.

CLARIDON PUPILS HEAR REV RAMEY

See full story in the Star

CLARIDON, O. May 21—Rev. L. A. Ramey of the First Evangelical church at Beech in the backwoods sermon last night at the Claridon school urged that instead of developing America the country develop Americans with interest in their country in terms of love and faith. The seniors in caps and gowns marched in procession into the auditorium. The service included a piano selection by John Midland, a song by a quartet composed of Lois Augen, Rev. Carl Miller, Mrs. Smith and Virginia Mae Epiphany, accompanied at the piano by Herman P. Watson music supervisor and selections by the community orchestra directed by Mr. Watson with Miss Margaret Howe on the piano.

A annual commencement exercise will be held Tuesday night at the school with Rev. Norman Summerville of Centerburg as speaker. School will close Wednesday with a noon picnic in the school auditorium.

300 Pupils Take Part in St. Mary Ceremony

More than 300 pupils of the grades and upper classes of St. Mary parochial school took part in the crowning of the statue of the Blessed Virgin one of the most impressive ceremonies of the closing activities of the school year yesterday afternoon at St. Mary church. The honor of placing the wreath on the statue was accorded to the fifth grade girls, a member of the senior class who were chosen by the committee for junior class and faculty of the school a week ago. Miss Mary Martha Luke also a senior was Miss Luke's attendant and the flower girl was Francesca Smith and Margaret Ann Ambruster pupils of the eighth grade. The honor of being chosen to crown the statue is the highest that can be bestowed on a senior girl.

Hymns sung by the pupils were "This Is the Month of Our Mother" and "This Is the Image of Our Queen." Mary Dearest Mother" and "Bring Flowers of the Rarest" Presiding at the organ was Miss Nancy Plaue.

Rev. Summerville officiating in the church was Rev. William F. Stoeckel, pastor of St. Mary's.

# CAMERA STUDIES OF JOHN D. ROCKEFELLER SR.

Top! Founder of Standard Oil at 31. (Center) The oil king at 50. (Bottom) At height of his power.

A "Giant of Wall Street" in 1900

John D. Rockefeller Sr. on his 94th birthday in 1933.

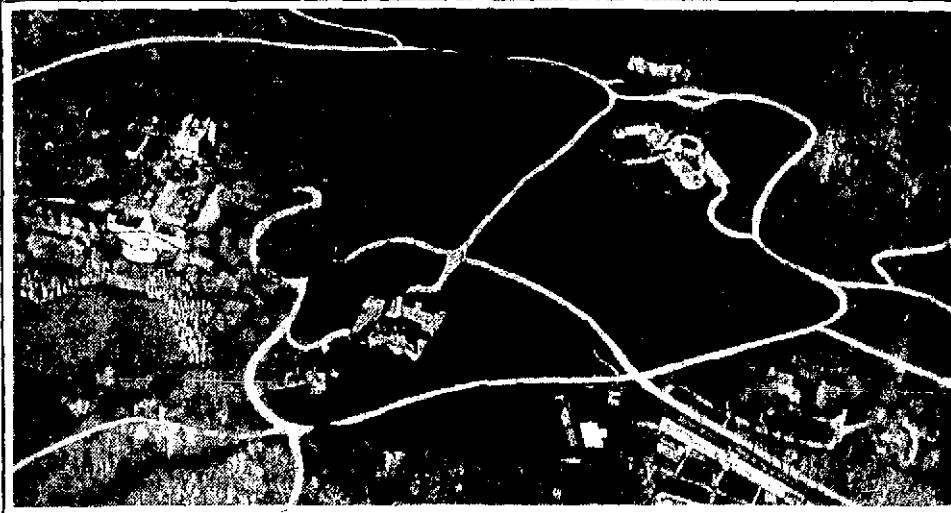

At his Lakewood estate in 1933

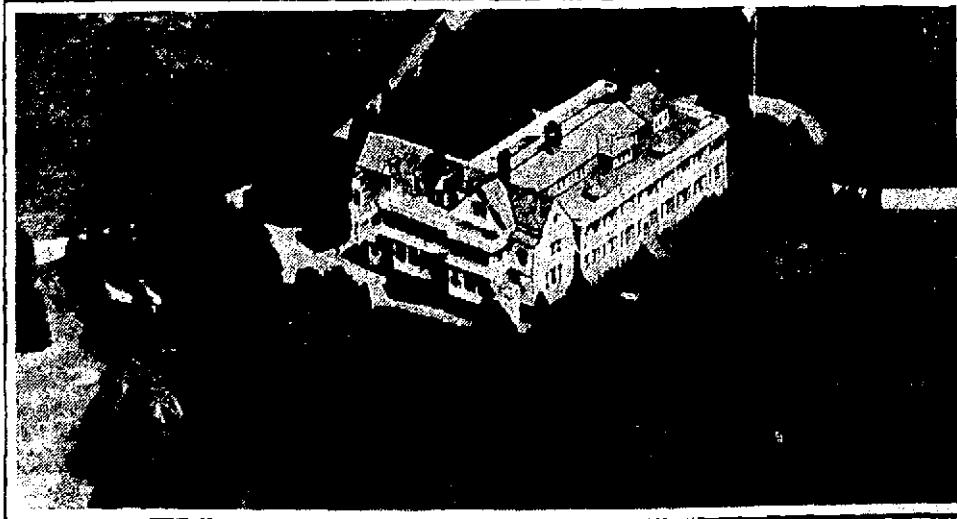

Three photographic studies made on Mr. Rockefeller's 94th birthday.

Distributing the famous dimes in 1932.

A vast estate of 8,000 acres—Mr. Rockefeller's Pocantico Hills home near Tarrytown, N. Y. Miles of highways wind about through the estate and the residences of his children and grandchildren dot it. Mr. Rockefeller enjoyed greatly his motor rides over the private roads shown above. In 1925, Mr. Rockefeller sold the estate to his son.

Above in Mr. Rockefeller's imposing old wooden house at Lakewood, N. J. Here he spent much of his time in the spring months. He called it "Golf House" because it was the first home of Lakewood Country Club. Mr. Rockefeller enjoyed making daily rounds of the house from top floor to cellar, giving servants small tips as he went.

Mr. Rockefeller is shown in an interesting study as he visited boyhood scenes near Cleveland in the summer of 1936. The oil king invited his many acquaintances and friends of his early days but continued to hold no interest in the area around Huron and Strongsville, where his father and mother owned their starting from New York state.

Well past 70 but still a player, Mr. Rockefeller is shown as he drops out the ball while playing golf in a hole putting contest on the Pocantico Hills estate after his health was good, he played daily and his ability remained to prove as he advanced in age.

The benevolent old gentleman in the twilight of life as he looked, basking in the Florida sunbath at Daytona Beach, in 1932.

Here is Mr. Rockefeller in his boyhood days and manly in his old age. He appears serious and thoughtful in his later years.

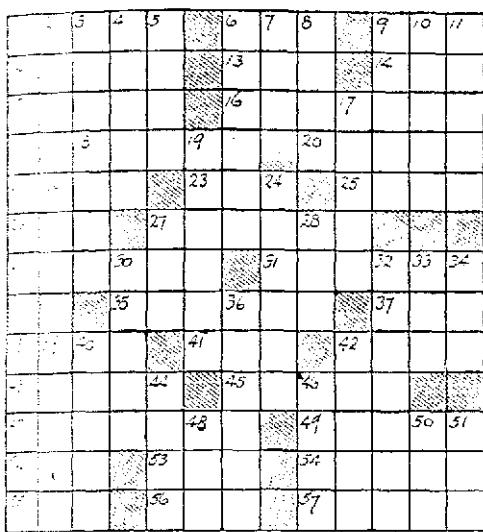

Smiling at the camera and care of his business he is shown in this阶段. Only recently he died in 1937.

## Daily Pattern for Home Use

BY ANNE ADAMS

WEAR THIS MODEL AT HOME! WEAR IT FOR EVERY OCCASION!

Send fifteen cents (15c) in coins or stamps (coins preferred) for this Anne Adams pattern. Write plainly size, name, address and style number.

Welcome the new Anne Adams pattern book as a guide to summer chic! It's brimming with flattering, easy-to-sew styles, slimming models the matron will love, eye-appealing sports, afternoon and dress-up frocks for every age—lots, Juniors and teens included. Profit by timely hints on summer fabrics on accessories, and how to keep "flower fresh." Send for your copy now! Book fifteen cents. Pattern fifteen cents. Twenty five cents for both when ordered together.

Send your order to The Marion Star, Pattern Department, 243 W. 11th street, New York, N. Y.

The Stars Say—  
For Tuesday, May 25.

A DAY of excellent promise is forecast from the dominant lunette and mutual configurations of planets. With the union of old crystallizations and mutations definite advances should be made in the affairs with business making real possessions increase and the financial status be stabilized.

Those whose birthday it is may expect to push forward for success of progress and stability.

How much of future achievement and ability are dependent upon the stars?

There should be a definite separation of confused and doubtful conditions, to be followed by increased finances, actual real possessions and investments, in all of which those influential persons, elderly friends or powerful contacts may be counted upon.

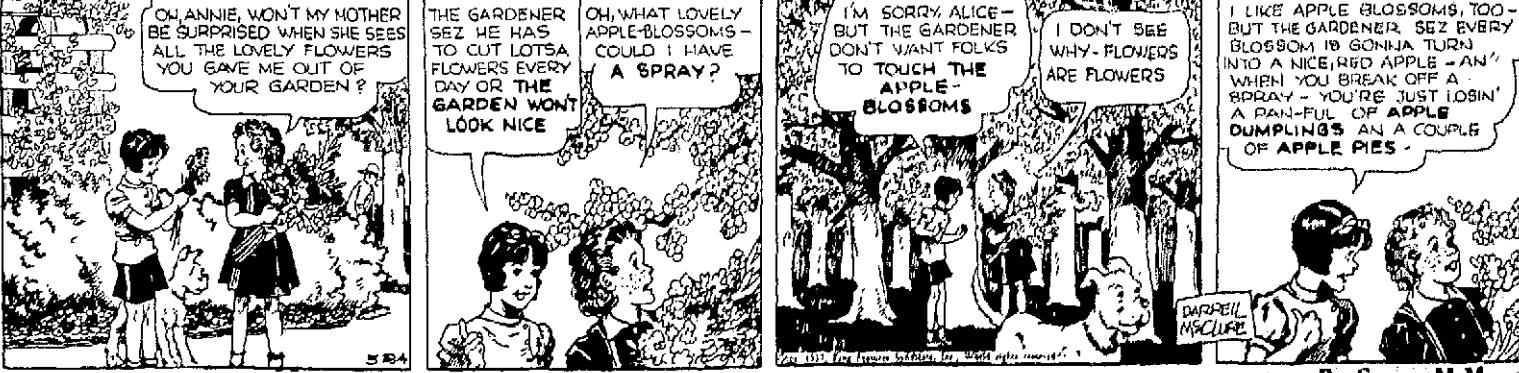

Those born on this day may be responsible, ambitious and progressive, inspiring the interest and support of its friends and those in authority.

Finance spread of only 13

days. Airplane has been invented that is capable of flying nearly 100 miles an hour.

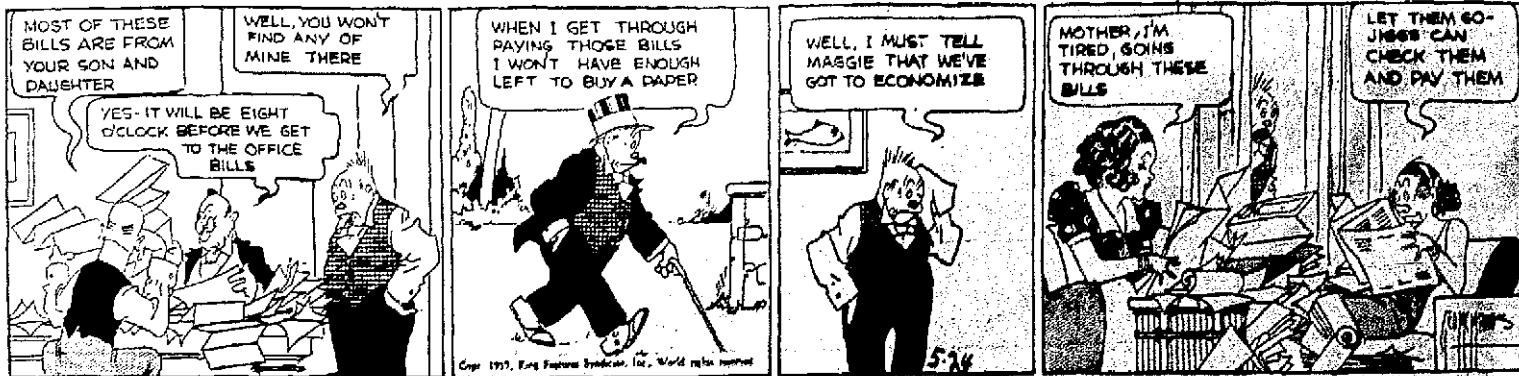

Automobile shields to be clamped to cars have been invented to protect English women from splashing water and

## RENEW APPEAL FOR PARK FUND

Board Chairman Expresses Disappointment at Response to Ticket Sale

A new appeal has been made to the public for contributions to the Marion Park Fund. The campaign, which started last Saturday, has raised \$1,000 so far. Despite the efforts of the Board of Park Commissioners, the amount is still less than half of what was collected last year.

The Board of Park Commissioners has decided to increase the amount of money to be collected by \$100.

### WILD WEST RODEO SHOW BOOKED FOR NIGHT FAIR

Band Music, Fireworks and Horse Pulling To Augment Western Event in Evenings.

A radio program packed with country music, dancing and demonstrations of fancy riding has been booked by the Marion county fair board as the principal feature of the Thursday, Friday and Saturday night fair programs for the 1937 Marion county fair, Sept. 13-18.

Band music and a 20-minute program of fireworks will supplement the Wild West rodeo, which will be performed in front of the grandstand.

The Wednesday night program will be given to the finale of the junior horse pulling contest open to boy and girl drivers from Ohio and Indiana.

There are 38 persons in the rodeo troupe and 75 head or stock including bulls, horses, Brahmas steers and cattle. The rodeo will be conducted through the Marion Livestock agency in Springfield after fair officials learned of the interest it had attracted at other fairs.

John E. Bixler, fair secretary, said the rodeo performers will give brief entertainment between heats of the horse pulling race in addition to giving a full-length program each night.

The radio program will be augmented by a 20-minute band concert, and the fireworks will be given after the wild west show.

The Sun Brothers rodeo troupe, which includes a number of Indians, may be held this summer, if Mainers answer Baker's challenge.

Grayson, N. Y., the first important international trotter to return to Marion since 1930, will be a result of a challenge by the American champion to the European champion to return to Marion, starting at \$1,000 and with only "the sky as the limit."

E. J. Baker, Marion, Ill., owner of the American champion Greyhound, 157-1, is the challenger, with Giovanni Mazzoni, Italian champion, returning from Marion, 2,002, a veteran over all rivals in Europe. The Trotting Horse club here is engaged in direct negotiations with the two clubs, which may be held this summer, if Mainers answer Baker's challenge.

Although Grayson's mark for the trot was seconds faster than Mazzoni's, the latter horse trotted a kilometer recently at Lyons, France, in 1:52, while Grayson's best time is 1:52.5 for one mile.

The last serious threat to American supremacy on the international trotting scene came from Austria when Willy, an invader from Austria, met the best American horses and usually won.

**SKIRI RADING TOMATO**

The Skiri Rading Tomato and South American are being received at Cheyenne for the purpose of pre-

paring for a summer party meeting.

Although Grayson's mark for the trot was seconds faster than Mazzoni's, the latter horse trotted a kilometer recently at Lyons, France, in 1:52, while Grayson's best time is 1:52.5 for one mile.

The last serious threat to American supremacy on the international trotting scene came from Austria when Willy, an invader from Austria, met the best American horses and usually won.

**MOOLASSES ON FARM FEED ROSTER NOW**

Molasses, always important in feeding the stock during the winter, is the fourth item in the new look.

Seven hundred school buses purchased for immediate delivery. They will supplement the 500 which were in operation during the past year.

In addition, extensive repairs are planned on many of the school buses to make them suitable for the constant grind of carrying heavy loads over rough roads.

Figures are not yet available.

During the 1936 general assembly, a strong protest against extending the school year was made.

It was decided to extend the school year by one month.

Through an educational campaign aided by the extension service, colleges and other educational institutions have agreed to stock materials before cold weather made handling difficult and about five thousand such was used during the year.

Tank cars of materials were purchased cooperatively and barreled.

It is evident that the use of molasses as a substitute for corn and in the feeding of relatively unimproved hampshire primroses promises to make a marked improvement in practice on many farms, officials conclude.

**5 MILLION PLANTS SET OUT**

FREMONT, O. — The J. J. Hough company here just signed long-term contracts of \$600,000 to furnish plants to growers in the Fremont plant area. P. E. Fenton of Hough's engineering staff came here to inspect the progress being made in the work of the extension service in the various areas which may be involved in time to handle the increased work.

## SEES NEED OF OHIO FORESTS

25 Million Acres or More Ad-  
vocated by Expert To Hold  
Back Water.

COLUMBUS, O.—Dr. H. N.  
Wheeler, United States forestry  
service, says the watersheds of the  
streams draining into the Ohio  
River should be increased from  
25,000,000 acres or more of forests  
to 30,000,000 to prevent heavy  
floods.

Mr. Wheeler does not claim that  
the increase would be the only means  
of controlling floods but he does  
believe that properly managed  
forests can help. He has made  
tests made on the Youghiogheny river  
watershed in West Virginia in 1931-32  
to show just how much water  
can be held back.

This area in Mississippi had 27  
miles of rainfall in a short period  
of time. The water level rose 100  
feet, which fell off again to the  
surface immediately. In addition  
to holding back water, forests  
help control soil erosion and  
less than one per cent of the water  
was lost through evaporation.

Mr. Wheeler says the use of  
forests in flood control in this area  
and many other areas in the  
country is not being fully utilized.

The state forests which attract  
tourists from near states for the  
pleasure of hunting, fishing and  
camping, the state forests provide  
a number of opportunities for  
the outdoor man to get some idea of its  
construction.

Mr. Wheeler says the use of  
forests in flood control is not  
the only use of forests in the  
country.

He quoted E. W. Dean, extension  
forester, Ohio State University, as  
saying that 7,600,000 trees were planted in  
Ohio in 1936. Most of these  
trees are already in forests and some  
of them are being used for timber  
purposes.

Mr. Wheeler says that the  
use of forests in flood control  
is not the only use of forests in the  
country.

forester, Ohio State University, as  
saying that 7,600,000 trees were planted in  
Ohio in 1936. Most of these  
trees are already in forests and some  
of them are being used for timber  
purposes.

Well-managed forests supply  
harvests of lumber, posts, poles  
and in addition to their value as refe-

### BARREL COOLER FOR MILK AIDS FARMERS

PAYETTE, I.—Photographs of the  
construction and use of the barrel  
cooler are offered in duration  
and explanation by the dairy extension  
department at Michigan State  
College.

A two-page leaflet, "How to  
construct and use the barrel  
cooler," is accompanied with information  
on processing milk in winter and  
summer at lower costs by the use  
of more roughage and  
softer summer and fall pasture.

Based on a 2.9 point increase in  
income for the first quarter, the  
gross farm income for the second  
quarter is estimated to \$183,000, or  
a gain of 10.2 per cent over 1936.

It was also pointed out that this  
is not the largest increase in  
annual earnings ever reached in  
1937 when the total gross return  
was \$185,000,000. The projected  
return for the expected 1937 crop  
will be 96.7 points higher than  
returns in 1936.

Rubberized silk raincoats and  
rubber boots that lace on the front  
are recommended for dogs to wear  
in wet weather.

### 1937 FARM INCOME OUTLOOK PROMISING

An increase of from 40 to 100 per  
cent in the farm implement busi-

ness throughout the country, is a  
certain indication of greatly im-  
proved farm prosperity, according  
to a survey made by a manufacturer.

Rubberized silk raincoats and  
rubber boots that lace on the front  
are recommended for dogs to wear  
in wet weather.

# YOU ALWAYS SAVE

STYLING CONTEST AWARDED

This advertisement appeared in the April issue of Good Housekeeping

It must keep them fresh

**THIS IS THE ESSENCE OF ALL REFRIGERATION, but the thing you take most for granted is in your refrigerator.** Good Housekeeping Institute makes the mechanical, or ice, reach refrigerator pass through a drastic engineering test to determine the effectiveness of the refrigerator to maintain the proper food compartment temperatures with economical ice or power consumption. The tests are made under accelerated conditions, with negative devices that give accurate readings of all variations within the refrigerator.

Then each refrigerator is given a kitchen service test in

which observations are made as to the way the finish stands, and the accessibility of shell spaces. The refrigerator is examined to see if it is substantially constructed and properly put together, and the insulation is inspected to ascertain if it is heavy enough and operates properly.

Because of these tests, Good Housekeeping can answer many questions about refrigerators. Because of them, more than two million readers have faith in Good Housekeeping and its advertising pages.

YOU CAN DEPEND ON PRODUCTS ADVERTISED IN GOOD HOUSEKEEPING. SEE PAGE 6.

It does!

## AMERICAS Number 1 REFRIGERATOR

Gives Everything Demanded of an Electric Refrigerator . . . yet Saves You up to 40%\*

"It must keep them fresh." That's the first thing any good refrigerator should do, as clearly stated above. Good Housekeeping says, "This is the essence of all refrigeration." The MW not only keeps food and vegetables fresh, but shows safe temperature within the refrigerator. 7 beautiful 1937 models! All steel, one-piece cabinet construction—twin interior lighting—full width sliding shelves—large Speedy freezer that provides all the ice you need—lifetime porcelain interiors—exteriors of durable

Dulux for lasting beauty and ease of cleaning—2-way door lock. And, in addition to these, the MW gives you the Food Froster, found in no other refrigerator. Money can't buy a finer refrigerator than the MW—yet, you save up to 40%! As added proof of MW quality and performance, each model has been tested and approved by Good Housekeeping Institute and carries its famous Seal of Approval. There's an MW Refrigerator for every family need priced to fit every family budget.

\*Model illustrated actually saves you better than \$50.00.

### Large Family Size 6½ CUBIC FOOT

\$5 DOWN, \$7 Monthly  
Small Carrying Charge **169<sup>95</sup>**

Big, roomy interior for the storage of large quantities of food . . . 14½ sq. ft. shelf area. Freezer makes 11½ generous size ice cubes, 10 lbs. ice per freezing. Sliding shelves bring food in rear up front. Exterior is of durable Dulux. Many other helpful, time-saving features.

**FOOD FROSTER**  
It's new . . . no other refrigerator has it! Ivory ovenware pottery molds in deep matching glass dish for chilled desserts, delicious molds, gelatinas and custards. The molds are so attractive they may be used for table service.

**FOOD GUARD-FAN**  
Shows safe food storage temperature at all times.

**2-WAY DOOR LOCK**  
Releases instantly with touch of hand or elbow.

**TWIN FRESH-ENERS**  
Large enough to hold back supply of vegetables.

**259 West  
Center St.**
